

208.6 - Relative Stress Optical Coefficient (bar form)

This SRM is for calibrating instruments used to measure the relative stress optical coefficient of glass.

Technical Contact: [melody.smith@nist.gov](mailto:melody.smith@nist.gov)

PLEASE NOTE: The tables are presented to facilitate comparisons among a family of materials to help customers select the best SRM for their needs. For specific values and uncertainties, the certificate is the only official source.

SRM	709
Description	Extra Dense Lead
Unit Size	(500 g)
<hr/>	
Relative Stress Optical Coefficient (C) at $\lambda=546.1$ nm (Value x $10^{-12}$ m <sup>2</sup> /N)	C = 1.359
